

Brayley Gattis

Find your passion and pursue it, but don't be afraid to try out other things along the way. Before I started college, I had never heard of nanotechnology before, but now that's what I plan to study while I work for my PhD!

B.S. in Chemistry- UA-Fayetteville
with Undergraduate Research.

Favorite class at Southside:
Chemistry and Psychology.

Favorite class at college:
Nanotechnology Laboratory,
Philosophy, Physical Chemistry II
(Thermodynamics)

Starting PhD at Northwestern in fall
2019

Brayley Gattis Chemistry senior undergraduate at U of A with Undergraduate Research.

Brayley went to Southside High School, University of Arkansas Undergrad, PhD Program TBD.

Science Classes in school; Pre-AP and AP Chemistry led you to your STEM position/ field.

Her favorite classes in high school: Chemistry and Psychology

Her favorite classes in college: Nanotechnology Laboratory, Philosophy, Physical Chemistry II (Thermodynamics)

She dreams of becoming a Research Chemist – finding new drug delivery methods.

Her advice to our young ladies: Find your passion and pursue it, but don't be afraid to try out other things along the way. Before I started college, I had never heard of nanotechnology before, but now that's what I plan to study while I work for my PhD!
