

Kaersti McLellan

B.A in Biology and Spanish- Hendrix
Favorite class at Southside: AP Biology
Favorite class at Hendrix: Biochemistry
Starting M.D. at UAMS in fall of 2020

Advice: Always be confident in yourself! Do not let others second guess your life and decisions for you because you're the one who must be happy with your choices. You have worked hard and deserve to be here in the STEM fields, as there is a place at the table for everyone in this career path. Even if it gets hard, and it will get hard, that does not mean you do not deserve to be there. There are so many fields and career paths in STEM, you do not have to be good at all of them to consider yourself an awesome scientist. I myself am not very great at Math and Physics but I found a love and passion for Biology and this is what I have pursued. Lastly, find a mentor to help you along the way. From advice to helping you find even more connections, they can help you be very successful in your field.
